

Information Security Policy

Credit Hours: 4

CSC 570 Online / On Campus

Instructor: Lucas Vespa, PhD

Office: 3119 UHB

Email: lvesp2@uis.edu

Course Description

The course includes a discussion on security policies that can be used to help protect and maintain a network, such as password policy, e-mail policy and Internet policy. The issues include organizational behavior and crisis management. The course will also include a discussion of regulatory compliance, legal and ethical concerns as it relates to Information Security Policies.

Major Instructional Areas

1. Security policy requirements
2. Security policy framework
3. Creation of security policies
4. Regulatory Compliance, Legal and Ethical Concerns
5. Implementation issues
6. Security policy controls

Course Objectives

1. Identify the role of an information systems security (ISS) policy framework in overcoming business challenges.
2. Analyze how security policies help mitigate risks and support business processes in various domains in the information technology (IT) infrastructure.
3. Describe the components and basic requirements for creating a security policy framework.
4. Describe the different methods, roles, responsibilities, and accountabilities of personnel, along with the governance and compliance of security policy framework.
5. Describe the different ISS policies associated with the user domain.
6. Describe the different ISS policies associated with the IT infrastructure.
7. Describe the different ISS policies associated with risk management.
8. Describe the different ISS policies associated with incident response teams (IRT).
9. Describe different issues related to implementing and enforcing ISS policies.
10. Describe the different issues related to defining, tracking, monitoring, reporting, automating, and configuration of compliance systems and emerging technologies.
